Session: Spring 2023 – 2027

Supervisor

Supervisor Name: Mr. Zaman Ali

1. Project Brief:

FitTrack is a simple and user-friendly web-based system designed to digitalize the gym management process.

The main goal of this project is to help both gym trainers and members easily manage their activities — such as member registration, attendance, payments, and fitness tracking.

The system will feature a responsive and easy-to-use interface, making it accessible on both mobile and desktop devices.

2. Objectives:

- Maintain gym members' records (name, contact, membership plan, etc.)
- Track attendance and payment status
- Manage trainers' schedules and assigned members
- Record basic fitness progress (weight, BMI, etc.)
- View all data through a simple dashboard

3. Tools & Technologies:

- Frontend:

Next.js (React-based Framework)
Styled Components (for component-level CSS styling)
Tailwind CSS (along styling and layout design)

- Backend:

Node.js (for server-side logic and API handling)

- Database:

Local JSON File / Local Storage (for storing data such as members, trainers, and payments)

4. Features:

- Member Registration & Login
- Trainer Profile Management
- Membership Plan Management
- Attendance Tracking
- Payment Record System
- Admin Dashboard
- Simple Fitness Progress Tracker.
